Tricoter en attendant Bébé : 28 modèles simples à réaliser

da: Fleurus

Modello: LIBFR-9782215109327

Tricoter en attendant Bébé : 28 modèles simples à réaliser au fil des mois : This book proposes adaptable models for the newborns, while following the development of your pregnancy. The first works are unisex, a few of them a little longer to complete just because during this time you have more time on your hands! By the second trimester the baby's sex is usually known, therefore you can create boys or girls models. The third trimester is dedicated to quick works or works for a bigger child: if they're not complete when the baby comes they will be later on! Covers, sweaters and comfortable waistcoats, pants, little hats, slippers coats, skirts, dresses and even a bib and plush toys ... while months roll by, knit your love for your little one!
