## Freezer Paper - Plastic Coated

da: Reynolds

Modello: ACCREY-GBN00390-12

### Freezer Paper - Plastic Coated

This kind of paper is very similar to Parchment paper (or paper used by the *butcher*) but with only one plastified surface. It's a white sheet with a waxed side that melts and becomes adhesive with the high temperatures of an iron. Ideal for all techniques and uses, perfect for quilting *templates*, appliqué or stencils. Lightly sticks to the fabric when using a hot iron.

Price is for one package containing a 50 squared feet roll (about 4.64m<sup>2</sup>) that is about 12,10 mt. x 381 mm.

**Price: € 12.44** (incl. VAT)
